You know the need to implement continuous improvement in your company, but where to start?

With a ViP print-specific Lean Foundation course for your staff

This three-day programme [one day a month] trains staff in the core principles of Lean and Best Practice by engaging them in an interactive factory simulation. Delegates take on a role in a fictitious printing company and are guided through a series of production 'shifts'. Between each shift the delegates are coached in Lean Principles and make improvements to their fictitious company. At the end of the three days participants set themselves objectives to use the new skills in their own workplace.

"The desk top factory linked back to our business so well. The whole programme was exciting and I feel that I have learnt a lot of beneficial processes that will be crucial to the improvement of our business."

Zeki Akdeniz, Master Scheduler at CPI Group

"Thoroughly enjoyable and very well presented. The practical role-play was an excellent introduction and allowed me to see the bigger picture."

Mags Symes, Customer Services Manager
at White Quill Press Ltd

WHO IS IT FOR?

Team leaders will benefit enormously from this and staff at other levels can use it as an easy and fun introduction to Lean principles or to top up their skills. This programme is run both as public courses and in-company for a minimum of six staff.

BENEFITS OF COURSE

- Short, cost effective three-day Lean training, one day per month
- Builds teamwork and learning from other organisations
- Lays the foundation for future continuous improvement initiatives
- Enhances the knowledge and skills of your staff as a refresher or introduction
- Interactive, enjoyable and engaging process

WHAT DOES IT COVER?

Delegates gain hands-on experience and understanding of basic lean principles using a print specific manufacturing simulation and practical exercises led by ViP engineers.

MODULE 1

- Using Key Performance Indicators (KPIs) to improve process and business fundamentals
